SUMMARY

Software Engineer with 4+ years of professional experience designing, developing, and maintaining scalable web and mobile applications. Proficient in multiple programming languages including JavaScript, Python, and C#, with hands-on experience using modern frameworks and libraries such as React, React Native, Node.js, Express.js, and Next.js. Skilled in RESTful API development and integration, database management (MongoDB, SQL), state management, responsive UI development, version control (Git), and performance optimization. Strong problem-solving abilities with a passion for clean code, agile development, and continuous learning.

SKILLS

Frontend Development: React.js, React Native, Next.js, Redux, NextAuth, Electron.js, Three.js

Backend Development: Node.js, Express.js, Django, ASP.NET Core, Firebase, Redis

Databases: MongoDB, Microsoft SQL Server, MySQL

Cloud & DevOps: Cloud Computing (AWS, Firebase), CI/CD Pipelines, GitHub Actions, Docker, Application Deployment, Build Automation, Environment Management

Development Tools: Git, GitHub, NPM, Figma

Professional Skills: Team Collaboration, Problem Solving, Communication, Leadership, Adaptability

EXPERIENCE

React Native Developer

Carrot Suit | Lagos, Nigeria

September 2024 – March 2025

- Developed and maintained scalable cross-platform mobile applications using React Native.
- Built reusable components and optimized application performance for better user experience.
- Collaborated with designers and backend engineers to implement new features.

Software Engineer

Kingdom Greatness International Church (KGIC) | Lagos, Nigeria

March 2024 – November 2024

- Designed and developed a desktop data analytics application using Electron.js and Chart.js.
- Integrated RESTful APIs and backend services using Node.js.
- Implemented data visualization dashboards to support reporting and decision-making.

Associate Software Engineer

Ochefi Technologies

(June 2023 – February 2024)

- Developed and maintained scalable full-stack web applications using the MERN stack.
- Built RESTful APIs and integrated frontend components with backend services.
- Participated in code reviews and followed best practices for clean and maintainable code.

Software Engineer Intern

Naving Technologies

(March 2021 – April 2022)

- Developed dynamic web and mobile applications using React.js, React Native, and Node.js.
- Assisted in building and integrating RESTful APIs.
- Gained hands-on experience across the full software development lifecycle.

PROJECTS

1. Data Management Desktop App

A desktop application for church membership and income tracking, built with React.js and Electron.js. Features interactive visual reports using Chart.js and a user-friendly interface for data input and exports.

2. Nuelmart

A responsive eCommerce application developed with React.js and Node.js. Includes product listings, shopping cart, and secure checkout, utilizing React Hooks and a mobile-first design.

<https://nuelmart.netlify.app>

3. Airmetrix

A modern courier service website built with Next.js , offering users a seamless experience to manage deliveries and track shipments.

<http://airmetrix.vercel.app>

4. Nufy Movies

A movie listing platform featuring trending movies, trailers, and production details. Built with a React.js frontend, Express.js backend, and MongoDB database.
